

## Forensic Science

**COURSE DESCRIPTION:** This course surveys key topics in forensic science, including the application of the scientific process to forensic analysis, procedures and principles of crime scene investigation, physical and trace evidence, and the law and courtroom procedures from the perspective of the forensic scientist. Through online lessons, virtual and hands-on labs, and analysis of fictional crime scenarios, students learn about forensic tools, technical resources, forming and testing hypotheses, proper data collection, and responsible conclusions.

**PREREQUISITES:** Successful completion of at least two years of high school science including Biology and Chemistry is highly recommended (or equivalents)

**COURSE LENGTH:** One Semester

**REQUIRED TEXT:** No required textbook for this course
